

Updated End of Quarter Agenda.

Amath 352
Applied Linear Algebra and Numerical Analysis

March 7, 2020

It's the end of the quarter already—that went fast! There are four things to keep in mind for this class as we prepare to wrap it up: homework redos, quiz redos, the final take-home quiz/reflection, and course evaluations. Here's what you need to know:

Homework Redo.

- You are allowed to resubmit one homework assignment or quiz reflection of your choosing.
- Communicate with me by email (creedon@uw.edu) which assignment you intend to resubmit.
- Turn in your assignment to Canvas by Friday, March 13 at 11:59pm.
- If your assignment had Scorelator questions, please attach your code to your assignment.

Quiz Redo.

- You are allowed to retake one of Quiz 1 - Quiz 3.
- You must agree to forfeit your previous quiz grade to sit for a retake.
- Quizzes will be made available on Canvas at 9am on Tuesday, March 17.
- Quiz redos will be due to Canvas at 11:59pm on Tuesday, March 17.
- Retakes will be similar to the original quizzes but not identical. The component skills will not be different.

Final Take-Home Quiz/Reflection.

- The final take-home quiz will be assigned Friday, March 6 and due Monday, March 16 at 11:59pm to Canvas.
- Collaborating with your peers is okay, but please write your own solutions. Write at the top of your take-home quiz with whom you collaborated.

- The focus of the final take-home quiz will be the last two weeks of class, namely the spectral decomposition and SVD. There is also a component of the take-home quiz that will have you reflect on what you have learned this quarter.
- You can earn two bonus points for typing the assignment in L^AT_EX. There is also a bonus problem on the assignment.
- You will be prompted on the take-home quiz to decide whether you would like to redo a quiz.

Course Evaluations.

- Please consider filling out course evaluations for this class. I value your input very much, and I am always inspired by suggestions offered in the course evaluations.
- I believe these evaluations are only out March 2 - March 13. I will remind you as best I can.
- If the evaluations receive an 80% response rate (or more!), I will give everyone two bonus points.
