

# TIPS FOR DELIVERING A SUCCESSFUL REMOTE LECTURE

1

## PROFESSIONALISM

Set a positive example for students by dressing well, sitting in an office or quiet location and maintaining good posture.

2

## COMMUNICATE EXPECTATIONS

Remember to outline expectations for participation and interaction throughout the session. Students will also want to know how to get your attention if they have a question.

3

## BREAK TIME

Be attentive and mindful of the length of the session and consider taking a 30-second break for “stretching” every 20-25 minutes.

4

## BE PRESENT

Use your webcam and make it a requirement for students to use their webcams as well. Students are more likely to pay attention when they know you and their peers can see them.

5

## BE PATIENT

Technical glitches will be expected so it is important to be as flexible as possible and keep calm and lecture on!
