Today it is clear that we are living in a global world. With modern technology and our increasing interconnectedness, what happens on one side of our planet now directly impacts our city. More than ever, it is important that DCPS is ensuring students graduate as global citizens.

That's where DCPS Global Education comes in! Our work promotes growth in the following 4 global competences for all DCPS students, preparing them to engage with the world beyond our city.

INVESTIGATE THE WORLD
DCPS Global Education invites students to start asking questions about the world and continue to foster that curiosity throughout their DCPS experience. Programs like the Embassy Adoption Program and International Food Days set younger students on a path of global inquiry.

RECOGNIZE PERSPECTIVES
With offerings like DCPS Virtual Exchange and Global Studies school models, DCPS students connect with people from around the globe. Learning that there is more than one way to exist in the world better prepares students to engage with others constructively.

COMMUNICATE IDEAS
Effective communication is a required skill not only for success in the workforce but for success in life. Whether its by studying a World Language or engaging with a foreign diplomat in the EAP, DCPS students learn how to express themselves to a variety of audiences.

TAKE ACTION
Global citizens strive to make the world a better place. Through community service activities during DCPS Study Abroad or completing an IB inquiry project, DCPS Global Education provides students with opportunities to positively impact the world around them. Students also have opportunities to take action through robust Cornerstone programming.
