

Psychology Project #1

Fields of Psychology

Assigned – Tuesday 8/25/2020

Due – Friday 9/4/2020

Choose a field in psychology. We already reviewed the 13 main fields in class during the first week. You do not have to choose one of those fields, if there is something else that you would like to do your project on please let me know.

Once you have picked one field of psychology, create a Google Slide project about that field of psychology.

The project should dive deeper into the fields of psychology than our first look at them

Items to include:

- a. What they actually do
- b. What type of education is required
- c. Why are they important to the study of psychology
- d. Who are some famous innovators in your chosen field of psychology (there should be at least one, but if you have trouble finding someone let me know)

Project should be 10-12 slides in total:

- Title Slide – Name, Field of Psychology, Picture (10 Points)
- 8-10 Slides – Information (80 Points)
- Sources Slide – Where did you get the information (you must have at least three sources – they can all be web pages if you like) (10 Points) If you do not do a sources slide the highest grade that you can get on the project is a 60%.

Total Points Possible – 100

Weight – x 3

Total Project Points - 300
