

Course Expectations:

Be PREPARED...

- Come to class either in school or virtually on time each day with your binder/notebook, pencil(s) and calculator.
- Take out any materials you need for the hour and fifteen minutes.

Be ENGAGED...

- Take notes daily in class.
- Be attentive and courteous when your classmates or teacher are speaking. Remember zoom is live and other students will not physically be in class.
- **Show all work in solutions.** This is helpful when doing homework problems, worksheets, not just on assessments. Writing out the process steps as a part of solutions helps learning. When written explanations are required for solution, complete sentences are to be used.

Be PROACTIVE...

- *ASK* questions if concepts or ideas are not understood. No topic related question is too unimportant to ask. Remember, the only bad question is the one not asked.
- Seek extra help. Ask when you don't understand something. Don't wait until "nothing makes sense". **You can find me in room 431.** I am available before and after school on most days but please let me know before to make sure I'm there. We will also need to make appointments this year.
- ALWAYS.....You can check answers and work on Canvas.

Be PROMPT...

- Come to class on time each day
- Turn in assignments on their date due, during class. If you are absent, it is **your** responsibility to make up any missed assignments, quizzes, and/or tests as well as obtaining any handouts or missed notes from someone who was present. Please tell me in advance when you want to meet with me to discuss your make-up work.

Materials: Graphing Calculator – recommend a TI-83 (+) or TI – 84 (+/ Silver/etc)
(Graphing) Notebook – recommend a 3 ring binder to keep organized
Pencil – always recommended for math classes

Course Outline:

Major Topics Covered (Order is subject to change):

Limits	Derivatives	Applications of Derivatives
Antiderivatives	Integration	Logs and e

By The Way.....

Cell Phones:

Technology provides us with some extremely powerful resources, but it can also lead to great distractions. The Student Handbook states “the use of handheld electronic devices is prohibited during class time without express teacher approval.”

Academic Integrity:

Please read the Student Handbook regarding the School’s policy on academic integrity. Any incident of cheating will result in a grade of zero and a phone call home. Cheating includes, but is not limited to, copying assignments, lending assignments to be copied by others, programming graphing calculators with information you are supposed to know without assistance, use of “cheat sheets” during assessments, etc. Repeated incidents of cheating could result in a zero for the course. Don’t jeopardize your integrity. Cheating, in any form, is NEVER worth it.

Extra Help: please email to set up times.
