Welcome to Precalculus Honors

Precalculus is a course dedicated to trigonometry. It is essential to your success in Calculus and other future math courses.

TOPICS: We are going to cover a range of topics including: radian measure, applications of radian measure, the unit circle, trigonometric functions, inverse trigonometric functions and trigonometric identities.

CANVAS: We are going to be using Canvas to structure our course. I will be posting our calendar, list of assignments, zoom links, etc. This is where you will go to find anything that you need for our course.

RESOURCES: We will use many different resources to help us master this content. Worksheets for practice, Delta Math and problems in our textbook. Delta Math is an online learning tool that will give you instant feedback on the learning goals. They will explain how to complete problems and help you if you make an error. This online platform is going to be great to help you determine if you are mastering the standards.

MATERIALS: It is important you have either a binder OR a notebook and a folder. You will be receiving practice packets and taking notes and it is important that you are able to organize these items.

BEHAVIOR: Appropriate and respectful behavior is expected at all times. Whether that be in the classroom or over Zoom. I hope that we can work together to create a learning environment that is fun and productive.

BACK TO
SCHOOL!

GRADING: Outlined below is our current grading system for this year. This has been created based on how this year is designed. It could be subject to change if we think that something could work better for us as a class.

<p>Homework Suggested problems from the textbook will be given if you feel that you would like more practice.</p> <p>Delta Math This will be assigned weekly and due on Wednesdays (rainbow days). You will be receiving a grade based on your score when you have completed the problem set. There will be time given during some class periods to work on this.</p>	20%
<p>Performance Assessments These will be given every week or so depending on the pace of the unit. They are designed to see how well you are mastering the learning goals. These will be given through Canvas.</p>	80%

I am so excited to be working with all of you this year!
