Agenda

• Customer Segments/Roles
• Archetypes/Personas
• Value Proposition
• Examples
• Case Studies
Assignment #2 – Individual Assignment

Every team has a project. Every project proposes to solve a problem, but we haven't yet proven to ourselves that we have identified the best business solution to that problem.

The assignment is to identify multiple possible solutions to the problem:

• Current Solutions: How do people currently solve the problem? Hint: it may not appear to be a direct competitor to your solution. Example: Instead of an electric scooter, I could ride a bike, take a bus or walk.

• Preventative Solutions: How might someone prevent the problem from occurring in the first place?

• Competitive Solutions: How do your (potential) business competitors solve the problem? Name at least three.

• Alternative Solutions: Another way you could solve the problem? Name at least three. Why is this your favorite and why?

This is a case where the more solutions you can identify, the better.
Assignment #3 – Individual Assignment

• Build a petal diagram to highlight your competition, and

• Perform a SWOT analysis for your team's idea.

• This is an individual assignment, not a team assignment.

• Submit in any format you prefer, graphic or list.
Agenda

• Customer Segments/Roles
• Archetypes/Personas
• Value Proposition
• Examples
• Case Studies
Definition: Customer Segments

• A well-defined group of people that share the same need/job/problem and can be served by the same business model.
What Makes a Good Customer Segment?

- They are PEOPLE (not companies, departments, ...)
- They **immediately** grasp the value and “own” the metric
- **Obvious** who they are
  - You could go to LinkedIn and/or co. directory and search for them
- There are very few people that fit the description that **won’t** buy your product
  - Laser focused on a well-defined group that ALL share the strong and direct value proposition
- Share the same business process and **“why”** for buying
- List ALL the key stakeholders
Customer Segmentation

Common Mistakes

• Too broad and vague

• Confused with industry segments

• Not traced through the value chain

• At organizational or department level

• Customer doesn’t “own” the metric or value
Who is the customer?
Stakeholders Roles

**End User**

The person who will actually use the product or service.

**Decision Maker**

The person with the clout to decide which solution gets adopted

**Payer**

The person who has the budget for the solution

**Influencer (external)**

The person who ‘weighs in’ on the solution selection, adoption, and/or purchase

**Recommender (internal)**

A person tasked with making solution recommendations

**Saboteur**

A person who loses out if the solution is adopted
Customer Roles Worksheet

For your project, list the specific role/job title that is likely to represent the various influence roles in the customer buying center. Note that some roles may not be relevant in your situation (e.g., insurance companies or “payers” play a critical role in healthcare payment, but may not be a critical role in other industries).
Working Groups

10 minutes

Stakeholders
By Title & Organization
Agenda

• Customer Segments/Roles
• Archetypes/Personas
• Value Proposition
• Examples
• Case Studies
Archetypes – Who Am I?

- Soccer Mom?
  - Jobs to be done
  - What do I worry about
  - How do I want people to feel about me
  - What are my demographics (age, disposable income, where do I live, etc.)
  - What are my psychographics (values, beliefs, contributions, volunteer, etc.)

- Surfer Dude?

- GM Engineer?

- Volunteers? Where is your ideal place to live?
Working Groups

10 minutes

Archetype Exercise
Agenda

• Customer Segments/Roles
• Archetypes/Personas
• Value Proposition
• Examples
• Case Studies
A strong and **direct value proposition** for a **well defined customer segment** is the single biggest indicator of start-up success.
• **Value Proposition** describes the benefit your customer (an individual) will derive by adopting your product or service.

• Not what your technology can do but what threshold above which the customer will act

• QRST
value
proposition

val·ue
prop·o·si·tion

ˈval-(ˌ)yü
prä-pə-'zi-
shən

noun

• A brief statement that explains how your products and services address the important jobs, alleviates the extreme pains, and creates the essential gains that a particular set of customer cares about.
Value Propositions Are Not…….

- Sales Pitch
- Specification Sheet
- Slogan
- Feature List
- Mission Statement
- ER Word (Better, Faster, Cheaper...)
<table>
<thead>

Watch Out: Expected Utility

The list of things your solution MUST do in order to even be considered.

These are not the value proposition but rather exclusion criteria.
Pain Killing Value Proposition

Magnitude of the Customer’s Pain

**Vague Future Ailment?** Don’t Care
Latent need, diffuse benefit, non-specific (vitamins)

**Mosquito Bite?** Nice to Have
Annoying, but not critical or life threatening (bug spray)

**Shark Bite?** Must Have
Life threatening (tourniquet)
Defining a great Value Proposition?

- Uses the language of the customer
- A direct benefit to the customer at an individual level
- Customers would say it
- Customers understand it immediately
- Uniquely delivered by your company
- Concise
- Quantitative, Specific, Relevant, Testable (QRST)
Value Proposition

Common Mistakes

- Confusing features with value
- Uses any word ending in “-er”
- Not linked to a specific customer segment
- Lacks specificity
- “nice to have” instead of a “got to have”
- Not enough customers care (nonviable market)
- Not unique to your technology/solution
- Not owned by the individual
  - Cure cancer, solve world hunger, …
Value Proposition Canvas
How do we find product – market fit?

**WHO** is the Customer and **WHY** do they buy?
Value Proposition Canvas

Identifying the Solution

Defining the Problem

What
Your Innovation

Who
A person with a Role in your ecosystem
Value Proposition Canvas

Answering the question **Why** requires you to complete the map.
A person with a Role in your ecosystem
My **USER** must perform a difficult daily **TASK**. My innovative **SERVICE** provides a **PAIN REDUCER** that reduces their **PAIN** by X amount*.

*almost infinite combinations
Defining a Great Value Proposition

- Specific and quantitative
- Customers would actually say it
- Customers understand it immediately
- Specific and quantitative
- A direct benefit to the customer
- Uniquely delivered by your company
- Concise
- Specific and quantitative

Testable Hypothesis

My USER must perform a difficult daily TASK. My innovative SERVICE provides a PAIN REDUCER that reduces their PAIN by X amount*.

*almost infinite combinations
Multiple Customer Segments

• Each has its own Value Proposition(s)
• Each has its own Revenue Stream
• One segment cannot exist without the other
• Which one do you start with?
Start with Customer Segment on the right side of the canvas. Build your initial canvas around a person (USER) in your target customer segment who is performing a job for which your proposed solution can provide significant benefits. For example, your individual customer might be a lab technician performing a diagnostic test, a service technician repairing an HVAC system, or a plant manager optimizing a production schedule.

1. Name the customer segment and briefly describe the key characteristics of this segment that distinguish it from other segments.

2. Within that customer segment, describe the job your individual customer is trying to accomplish. What outcome does he or she want to achieve? How do they measure success (i.e., what metrics do they consider most important, and what level of improvement do they seek on these metrics)?

3. What are the critical steps in your target customers' workflow as they complete this job currently?

4. Define the problem. What is the fundamental problem you believe your customer is trying to solve while completing this job?

5. What 2-3 pains and/or potential gains do you believe are most important to them?
Working Groups

10 minutes

VP Canvas
Customer Segment/Role ONLY
10 Characteristics of a Great Value Proposition

1. Is embedded in a great business model
2. Focuses on what matters most to the customers
3. Focuses on unresolved pains
4. Target few jobs, pains, and gains but extremely well
5. Goes beyond functional jobs and address emotional & social jobs
6. Align with how customers measure success
7. Focuses on jobs, pains and gains that people will pay a lot of money for
8. Differentiate from competition
9. Compete substantially on at least one dimension
10. It is difficult to copy
Assignment #4 – Individual Assignment

Draft 3 value propositions for 3 different stakeholders within the same Industry/Customer Segment (9 total). Use the VP format provided in class.

Pick one role/VP that best represents the PRIMARY VP for your business. Now complete a Business Thesis Template format as provided in class (Elevator Pitch).

The Business Thesis Template is available in the Resources Tab in Compass as well.

Functional job to be done
One sentence business thesis: Our Rapid Custom Ankle Foot Orthosis Kit (product or service) helps certified orthotists (customer segment) deliver custom composite AFOs in a single appointment (job to be done) by reducing (verb such as “reducing”, “avoiding”) the device fabrication time and expensive fabrication equipment (a customer pain) so that orthotists can increase (verb such as “increasing”, “enabling”) the profitability of their clinical practices and improve patient satisfaction. (a customer gain).

How will this improve?
Customer Roles - Team 17 MLProfiler
Currently looking at education as the next market

**End User:** Elementary, Middle School & High School Teachers, esp Special Ed Teachers

**Decision Maker:** Director of Secondary Education

**Payer:** Accounts within school district. In Iowa, accounts within regional mental health districts.

**Influencer:** State Reps, State Senators, Staff at Education for Equity, parents, and others who pressure schools

**Recommender:** Primarily teachers & parents, but may include principal or superintendent.

**Saboteur:** Oddly, a middle-to-high manager at a regional mental health district. Also a well-established local psychologist.

customer jobs*

what customers are trying to get done in their work and in their lives

task to perform, problem to solve, needs to satisfy

✓ Customer A
✓ Customer B
✓ Customer C
✓ Customer D
customer pains

describe bad outcomes, risks, and obstacles related to customer jobs

✓ Customer A
✓ Customer B
✓ Customer C
✓ Customer D

customer gains

describe the more or less expected benefits the customers are seeking
“Pains”
Frustrating outcomes, risks and obstacles

✓ What do they find too costly about current options?

✓ How are current solutions underperforming (slow, too expensive, lack of features, malfunctioning, poor quality, etc.)?

✓ What are their top 3-5 challenges, difficulties or frustrations with current options (convenience, quality, reliability, interoperability, accessibility, etc.)?

✓ What keeps them awake at night (issues, worries, concerns)?

✓ What barriers are keeping customers from adopting other options?
“Gains”
Benefits stakeholders are seeking

✓ What outcomes do they expect (articulated needs) and what would exceed their expectations (often unarticulated needs)?

✓ How do current options satisfy / not satisfy them?

✓ What would make their job or life easier / less frustrating?

✓ What positive social consequences do they desire (perception, status, power or influence, etc.)?

✓ What would increase the likelihood they would adopt a solution?
products & services

A list of all the products and services a value proposition is built around

- Customer A
- Customer B
- Customer C
- Customer D
Your Idea: Products or Services
Deliver on the Value Proposition

• Hardware
• Software
• Training / consulting
• Bundling
• Warranty
• Brand
• Customization / personalization / access
• etc.

Elements needed for a complete solution needed to get and keep customers
painless relievers

- User A
- User B
- User C
