**Textbook:**  
Key Concepts in Geomorphology, Bierman and Montgomery, Freeman Publishers, 1st Edition ($70-105)  
Fieldbook or similar 7x5” or 6x8” sturdy notebook required for labs and fieldtrip

**IDEA Learning Objectives:**  
**Essential:** Learning fundamental principles, generalizations, or theories, and applying them  
**Important:** Gaining factual knowledge and developing skills needed by professionals in the field  
**Practice working with others in a team; analyzing and critically evaluating arguments

**Laboratory exercises and field trips:**  
The lab section is absolutely essential to learning geomorphology and more important than any given lecture. The field trips and lab exercises will be tied to the lecture section and are intended to illustrate how geomorphic research is done through exploration of the landscape of our region. We have a very important weekend trip to Southern Utah. If the weather stinks, we will suck it up and go on field trips anyway. *The course fee of $90 is consumed by travel on lab and weekend fieldtrips, with minor remnants going towards lab materials.*
